## We Are Sivam

Crafted by those with an enduring passion

Coatings are the essential element that enhance aesthetic appeal, convey ideas, and transform the visual aspects of an object or environment. Serving as both a strategic and emotional component, for over 70 years, SIVAM has been dedicated to producing wood coatings, driven by a fervent desire to elevate the value of our customers' projects.

## Research & Development

SIVAM Coatings directs its significant investments and a resources toward the R&D sector, the activities are geared towards to the development of new products, process optimization, the integration of innovative technologies, and the resolution of technical challenges. A constant focus is maintained on safety and environment.

## Environment

"The pursuit of economic growth and commercial development should not come at the expense of compromising the respect and protection of the environment."

Cesare Zocchi  
SIVAM Coatings Member of the Board

## Interior coatings

Protect and enhance the wood substrate

SIVAM Coatings offers products for wood specifically designed for the furniture, flooring, door, and kitchen industries. These coatings serve not only to protect but also to elevate the aesthetics of the treated surfaces.

Resistance to chemical and physical abuse, along with durability against aging and wear, are just a few of the benefits derived from SIVAM Coatings' interior products.

**RESISTANCE** TO AGING AND WEAR

**ELEVATE** THE QUALITY AND AESTHETICS

## Solutions

### HERITAGE

The evolution of coatings in Italy and globally is rooted in historical elements that have developed to support the world of design and furniture since 1949.

### PERFORMANCE

Acrylic-based products enhance the natural beauty of the surfaces on which they are applied, ensuring maximum resistance to yellowing of the film and the wood itself, imparting the unfinished effect. These products also guarantee excellent chemical and physical performance.

### ENVIRONMENT

Water-based wood products represent the most environmentally sustainable offering that SIVAM Coatings can provide to an increasingly discerning and demanding market today.

### TECHNOLOGY

UV-curable products represent the most efficient combination of high productivity and maximum chemical-physical performance today. With the ability to customize our products and tailor them to customer needs, we can address various application and production requirements.

## Exterior coatings

### Design with protection against atmospheric elements

Choosing the right coatings and following the proper application process ensures excellent results and extends the lifespan of all exterior projects. When selecting your construction material, SIVAM Coatings will assist you in choosing appropriate aesthetic and performance options. SIVAM Coatings' exterior products provide enduring protection against humidity, UV rays, and atmospheric agents, preserving the natural beauty of wood and maintaining its integrity over time. The ultimate expression of appreciation for wood is achieved by adding aesthetic value and protection. All products in the SIVAM Coatings exterior range can be pigmented and customized using the KINGFISHER Color System.

## Solutions

### WINDOW & FRAMES

Windows and doors transform into architectural features that are not only practical but also integral components of interior design. Elevating their aesthetic qualities and ensuring long-term durability are additional benefits of a proper finishing cycle.

### DECKING

A wooden floor enhances the ambiance of any space. Safeguarding and enhancing it is the core mission of SIVAM Coatings' decking products, engineered to offer exceptional durability and resilience in all conditions, even the most demanding. They are crafted for customization in any desired shade, catering to the preferences of the end-user.

### BUILDING PRODUCTS

Protecting against humidity and the effects of time forms the foundation of the design behind SIVAM Coatings products for structural elements. These formulations are specifically crafted to ensure optimal protection for beams, columns, and various other wooden structural components. Engineered for application using conventional industrial systems.

### OUTDOOR LUXURY FURNITURE

Similar to indoor furniture, outdoor furniture must guarantee both physical durability and aesthetic charm to endure as beautiful and functional pieces over time. These items were crafted to cater to diverse aesthetic preferences while upholding essential resistance to sunlight and fluctuating weather conditions. They can easily be colored in subtle or semi-opaque finishes, imparting added vibrancy and protection.

# Kingfisher Color System

The world of color at  
your disposal

The Kingfisher Color System spans the extensive spectrum of colors accessible to the furniture industry and beyond, efficiently characterizing, formulating, and replicating colors within the system. It comprises a wide array of products, including pigments, converters, dyes, and patinas, along with the use of spectrophotometers, software, and dispensing equipment. The harmony between the coatings and the sophisticated tools of the Kingfisher Color System enables the precise and easily reproducible attainment of colors. This, in turn, reduces preparation times, enhancing efficiency in the color characterization and formulation process.

## Solutions

### TINTING SYSTEM

A infinite array of colors achieved through the union of dedicated converters and pigmented pastes. A diverse range of products, including polyurethane, acrylic, and water-based coatings. This variety enables you to choose the system that best aligns with your specific requirements, leveraging the benefits offered by each technology.

### PATINAS

The collection of patinas available within the SIVAM Coatings range has the capability to elevate any surface with unique effects, such as cerusing or hang-up glaze. Specifically crafted to enrich interior decor, these products provide a natural and sophisticated aged appearance to your furniture, creating depth, dimensionality, and infusing charm and character into the space.

### STAINS

The colors within various SIVAM Coatings systems serve to enhance the wood substrate, elevating its aesthetic appeal and maintaining the innate beauty of the woodwork. With a diverse palette, you have the flexibility to opt for natural tones like dark or light wood or choose more daring and vibrant colors.

### HARDWARE AND SOFTWARE

SIVAM Coatings offers a range of tools and technologies to guarantee optimal color precision and reproducibility. These encompass automatic gravimetric dispensers, manual dispensers, colorimetry software and spectrophotometers.
